INVITATION TO PARTICIPATE

GNEC reference: 20512

Project Description: The Paarl Golf Club (NPC) is currently in the process of applying for approval of a River Maintenance Management Plan for the maintenance and removal of silt from the in stream storage dams as part of the Boschenmeer Golf Estate. The storage dams are situated in the Boschenmeer Golf Estate on Erf 26054 and Remainder of Erf 8434, Paarl in the Western Cape. The silt accumulation reduces the storage capacity of the dams and therefore reducing the amount of water to be stored for the irrigation of the golf course. The Paarl Golf Club (NPC) is at the same time in the process of applying for approval of a Basic Assessment for the construction of a Silt Trap on Erf 26055, in the Malan stream, as part of the Boschenmeer Golf Estate to prevent the silt from accumulating in the in stream storage dams and reducing the storage capacity.

Locality: The Boschenmeer Golf Estate, otherwise known as Paarl Golf Club, is situated on the outskirts of Paarl approximately 1km east of Paarl Mall and south of the N1. The Golf estate is located along the R301 (Wemmershoek Road) from Paarl to Franschoek.

Listed Activities: A River Maintenance Management Plan was submitted to the Department of Environmental Affairs and Development Planning for the silt removal from the in stream dams. A Basic Assessment Report is planned to be submitted to the Department of Environmental Affairs and Development Planning for the Silt Trap on 22 March 2019. Both are in terms of the National Environmental Management Act of 1998 (Act No. 107 of 1998) read together with Activity 19 in Government Notice No. 327 in Government Gazette No. 40772 from 7 April 2017.
