Comments (You are welcome to attach more sheets if necessary (Your comments will be considered in the Basic Assessment process))

To consider putting high density units in a rural area is illogical. This Village has a rich Heritage that is it's strongest asset. It is the one area that gives SLP a Tourism potential.

The ecological type of this land is rich in Geophytes and not visible out of season. So to dismiss the land "as having no conservation value" is misguided and arrogant. ***

Thank you for your participation

This reckless use of this land resource is regrettable, and highlights the fact that there are many, who still not have learned the lesson that the 2018 droughts tried to teach us all; consider the resources that we have, and use them wisely.
